PROFESSIONAL SUMMARY

As a seasoned front-end developer with six years of professional experience, I have honed my skills in crafting visually captivating and highly functional user interfaces. Working closely with cross-functional teams, I have successfully translated designs into reality, delivering seamless and intuitive user experiences. Throughout my career, I have remained at the forefront of emerging technologies and trends in the dynamic web development industry, constantly expanding my knowledge base. Beyond my expertise in front-end technologies, I have developed a solid understanding of back-end technologies, allowing me to collaborate effectively with back-end developers and ensure smooth integration and seamless data flow between the front-end and back-end layers. Embracing the principles of DevOps, I have actively employed automation tools to streamline the building, testing, and deployment processes, enhancing efficiency and maintaining the highest standards of quality. In summary, my extensive six-year tenure as a front-end developer has equipped me with the essential traits of versatility, adaptability, and innovation required to breathe life into web applications.

EXPERIENCE

SOFTWARE ENGINEERING MANAGER / FRONTEND ENGINEER

Swipe - www.swipe.ng

Lagos, Lagos Nigeria

May 2019 - Current

- Scheduled front end to meet the needs of business and keep the team productive.
- Define and implement coding standards, front-end architecture, best practices, and quality assurance processes to maintain high standards of development.
- Oversee project planning, including task allocation, resource management, and project timelines. Conduct code reviews and provide constructive feedback to ensure code quality, performance optimization, and adherence to project requirements.
- Stay updated with the latest technologies, frameworks, and trends, and make recommendations for their implementation in projects.
- Collaborate with stakeholders to gather and analyze requirements, translating them into technical specifications and actionable tasks.
- Monitor and track project progress, identifying and mitigating risks, and ensuring timely delivery of front-end projects.
